

Thrust Roller Bearing with Washer

This thrust roller bearing is designed for high axial loads. It incorporates a washer to ensure even load distribution.

Product Overview

High-Performance Axial Load Management

This thrust roller bearing with washer is engineered for demanding industrial environments where axial loads are significantly higher than radial forces. The design incorporates a precision set of rollers paired with high-durability washers to ensure uniform load distribution. It is an ideal solution for specialized machinery, automotive, and heavy-duty tractor components requiring reliable performance under pressure.

Technical Specifications

Standard Models

- AXK1024
- AXK1730
- AXK2035
- AXK3047
- AXK4060
- AXK6085
- AXK120155
- AXK160200

Compatible Series

AXK, AS, LS, WS, ZS

Quality & Compliance

Certifications

ISO/TS-16949:2009 • ISO9001:2008

Applications

Industry Applications

- Truck assembly
- Tractor manufacturing
- Automotive components
- General industrial machinery
