Product Overview

Efficient Solar Illumination

This tiered outdoor solar pathway light provides a sustainable and decorative lighting solution for gardens and walkways. Utilizing high-efficiency solar panels, it converts sunlight into electrical energy during the day to power the light automatically at night. Its durable, weather-resistant construction ensures reliable performance, making it an ideal choice for enhancing landscape aesthetics without the need for complex wiring.

Technical Specifications

Dimensions	12.7 x 12.7 x 45.4 cm
Materials	Stainless Steel, Plastic
Battery Capacity	300 mAh
Battery Type	14430 LiFePO4

Lighting Performance

Brightness

10 lm

Lumen Output

Color Temperature	3000K (Warm White)
-------------------	--------------------

Power & Operation

Power Source

Solar Powered

Charging Time	6 hours
Working Time	6-8 hours
