

Tile and Stone Diamond Cutting Wheel

This diamond cutting wheel is designed for precision cutting of hard materials such as tile, stone, and concrete. The segmented rim allows for efficient debris removal and cooling, extending the life of the blade.

Product Overview

Professional Diamond Cutting Performance

This diamond cutting wheel is engineered for precision cutting of hard materials, including tile, stone, and concrete. Featuring a high concentration of industrial-grade diamonds, it delivers fast, clean, and efficient cuts. The segmented rim design facilitates superior debris removal and cooling, significantly extending the operational lifespan of the blade for demanding construction and renovation tasks.

Technical Specifications

Key Features

- Segmented rim for efficient debris removal
- High concentration of industrial-grade diamonds
- Enhanced cooling capabilities
- Extended blade lifespan

Suitable Materials

Tile, Stone, Concrete

Usage

Ideal For

Construction • Renovation • Professional masonry
