

Tile Shaping and Smoothing File

This hand-held tile file is designed for shaping, smoothing, and refining the edges of tiles. It features a durable abrasive surface and a comfortable handle.

Product Overview

Professional Tile Shaping and Smoothing File

This high-performance tile file is specifically engineered for precision shaping, smoothing, and refining the edges of various tile materials, including ceramic, porcelain, and glass. Designed for both professional installers and dedicated DIY enthusiasts, it ensures a clean, professional finish on every project. The tool features an abrasive surface for efficient material removal and an ergonomic handle that provides superior control while reducing hand fatigue during prolonged use.

Technical Details

Key Design Features

- Durable abrasive surface for efficient material removal
- Ergonomic handle design for precise control
- Engineered to reduce hand fatigue
- Suitable for manual tile edge refinement

Target Users

Professional Tile Installers • DIY Enthusiasts

Compatible Materials

Ceramic, Porcelain, Glass
