

Tilting Industrial Washing Machine

This robust industrial washing machine is designed for heavy-duty laundry applications. Its tilting mechanism allows for easy loading and unloading of materials, improving operational efficiency.

Overview

Professional Industrial Tilting Washer

This high-capacity industrial washing machine is engineered for heavy-duty commercial laundry applications, featuring an automated tilting mechanism for seamless loading and unloading. Built with premium stainless steel, it offers exceptional corrosion resistance and long-term durability for demanding hospital and hotel environments. The system utilizes advanced pneumatic valve control and a suspended vibration absorption design to ensure stability and reliable operation.

Control & Automation

Control System	Programmable microcomputer with dot matrix LCD
Automated Cycles	Washing, Disinfection, Bleaching, Dehydration

Performance

Motor Drive	Variable frequency speed control
Dehydration Speeds	4

Build Quality

Material	Quality stainless steel
----------	-------------------------

Operational Efficiency

Unloading	Automatic tilt discharge
Control Method	Pneumatic control valves
