

# Timber Trailer with Integrated Crane

This timber trailer is designed for transporting logs and timber in challenging terrains. It features a robust steel frame, high flotation tires for stability and maneuverability, and an integrated crane with winch for easy loading and unloading.

## Product Overview

### Rugged Timber Transport Solution

The WY-A01 is a heavy-duty timber trailer engineered for efficient log transport in demanding off-road conditions. Equipped with a robust steel frame and high-flotation tires, it provides superior stability and maneuverability across challenging terrain. The integrated crane and winch system streamlines the loading and unloading process, while adjustable support legs ensure maximum safety during operation.

## Technical Specifications

### Terrain Compatibility

Off-road • Challenging Terrain

### Towing Compatibility

- ATV
- UTV

### Stability System

- High flotation tires
- Adjustable support legs

### Integrated Handling

Integrated Crane, Winch-equipped

### Frame Material
