

Time Trial Bicycle

This is a mobile phone. It is a mobile phone.

Overview

High-Performance Aerodynamics

This time trial bicycle is engineered specifically for competitive racing, prioritizing aerodynamic efficiency and raw speed. Built with a lightweight carbon fiber frame and deep-section wheels, it minimizes drag to help riders maintain higher velocities. The integrated handlebar extensions and streamlined geometry make it an ideal choice for time trial events where every second counts.

Technical Specifications

Frame Material	Carbon Fiber
Wheel Configuration	Deep-section wheels
Handlebar System	Aerodynamic with integrated extensions

Features

Key Performance Features

- Aerodynamic efficiency
- Lightweight construction
- Drag reduction technology
- Streamlined racing geometry

Primary Usage

Time Trial • Competitive Racing
