

Tire Changer Machine

This tire changer is a robust machine designed for efficient tire removal and installation. It features a powerful motor, a sturdy frame, and user-friendly controls.

Product Overview

Professional Tire Maintenance Solution

This robust tire changer is engineered for high-volume tire shops and automotive service centers seeking reliability and efficiency. It features a powerful motor and a heavy-duty frame to ensure consistent performance during intense daily operations. The unit is designed with an ergonomic interface that promotes operator comfort while maintaining precision during the mounting and removal process.

Technical Specifications

Key Performance Metrics

24 inches Max Clamping Range	41 inches Max Wheel Diameter	12 bar Max Operating Pressure
Minimum Clamping Range	10 inches	
Minimum Operating Pressure	8 bar	

Key Features

Integrated Components

- Bead breaker
- Mounting head
- Clamping jaws

Design Characteristics	Heavy-duty frame, Ergonomic design, Pneumatic operation
