Overview

Professional Waste Management Solution

This high-performance macerator pump is engineered for efficient waste removal in residential and commercial environments where gravity drainage is not feasible. The system features a durable, corrosion-resistant plastic housing designed for longevity and reliable operation. With multiple inlet and outlet configurations, it provides versatile plumbing options for toilets and additional fixtures, ensuring a seamless installation process.

Technical Specifications

Inlet Options

- 1 Toilet inlet
- 2 Side inlets
- 2 Optional top inlets

Outlet Options

- 2 Discharge outlets
- 1 Air vent

Housing Material

Durable corrosion-resistant plastic

Key Features

Waste grinding, Anti-airlock vent, Multi-inlet, Corrosion resistant

Application

Ideal Applications

Residential • Commercial • Non-gravity drainage
