Product Overview

Precision Tool Maintenance

These professional-grade sharpening stones are engineered from high-quality abrasives and a durable vitrified bond for superior performance. They are expertly designed to facilitate efficient sharpening, lapping, and honing processes for a wide array of cutting implements. The consistent composition ensures reliable material removal, helping to maintain optimal edge geometry for industrial and precision tools.

Material & Construction

Construction Materials

High Quality Abrasives, Vitrified Bond

Usage & Application

Core Functions

- Sharpening
- Lapping
- Honing

Available Forms

Single Stone • Combination Stone • Irregular Shape
