Product Overview

Industrial Tool Suspension

This industrial spring balancer is engineered to suspend and counterbalance heavy tools and equipment, significantly reducing operator fatigue during repetitive tasks. Featuring a retractable cable system with adjustable tension, it ensures tools remain easily accessible and maneuverable within assembly lines or workshops. The durable housing is designed to withstand rigorous industrial environments, providing a reliable solution for ergonomic tool management.

Technical Specifications

Rated Capacity

1 A

Capacity Class

Core Features

- Adjustable spring tension
- Retractable cable mechanism
- Overload protection
- Cable retention system
- Durable industrial housing

Common Applications

Assembly Lines • Workshops • Industrial Manufacturing

Certifications

CE
