

# Top Discharge Air Conditioning Condenser

This top discharge condensing unit is engineered for residential and light commercial applications. It features a compact design, quiet operation, and robust construction for lasting performance.

## Product Overview

### Series 1 Top Discharge Condensing Unit

The Series 1 Top Discharge Condensing Unit offers a robust solution for residential and light commercial climate control. Featuring a vertical airflow design and a large heat-exchanger surface, this unit ensures high air volume with minimized noise levels. Built with a durable galvanized steel cabinet, it is engineered for long-term reliability and weather resistance.

## Technical Specifications

Cooling Capacity	24000 BTU
Power Supply	220V/1PH/50Hz
Compatible Refrigerants	R22, R407C, R410A

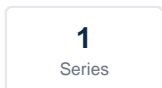

## System Compatibility

### Supported Indoor Units

- Wall Mounted Split
- Duct Indoor Unit
- Cassette Indoor Unit

## Features

### Key Performance Features

## Construction

### Material Composition

Galvanized Steel Cabinet • High Efficiency Aluminium Fan
