

Top Freezer Refrigerator

This top freezer refrigerator is designed for efficient cooling and food storage. It features separate compartments for frozen and fresh goods, adjustable shelves, and a temperature control system.

BCD-175

Product Overview

Professional Cooling Solution

The BCD-175 is a compact top-freezer refrigerator engineered for efficient food preservation in smaller kitchen environments. Featuring dual separate compartments for frozen and fresh items, it provides versatile storage through adjustable shelving and door bins. Its energy-efficient design ensures reliable performance while minimizing electricity consumption for daily operations.
