

Top-Freezer Refrigerator

This top-freezer refrigerator is designed for household use. It features a two-door design with the freezer compartment located above the main refrigerator section.

Overview

Compact Top-Freezer Efficiency

This top-freezer refrigerator provides a balanced solution for efficient food storage with a total capacity of 113 liters. It features a convenient two-door design, separating the 74-liter refrigerator compartment from the 39-liter freezer. Engineered for versatility and reliability, it is an ideal cooling solution for compact professional environments or modern small-scale living spaces.
