Top-Load Washing Machine with Microcomputer Control

This top-load washing machine has a 4.5kg capacity for both washing and spinning. It features a microcomputer controller, time-to-finish display, a stainless steel basket, and an electronic water level switch.

Product Overview

Compact Efficient Washing Solution

This top-load washing machine offers a 4.5kg capacity, ideal for compact laundry spaces while maintaining professional-grade cleaning performance. Engineered with advanced microcomputer control, it features flexible presets and four distinct water levels for optimized water usage. The combination of a durable stainless steel basket and a high-performance circulation system ensures thorough care for your garments.
