

Top-Loading Impeller Washing Machine

This top-loading washing machine features a blue-tinted transparent lid and a white exterior. It utilizes an impeller-type agitator inside the drum and has a control panel with multiple buttons for various wash cycles and settings.

Product Overview

Compact Performance

This top-loading impeller washing machine is designed for efficient laundry care with a 5kg capacity. It features a durable metal cabinet and a high-quality stainless steel inner tub for reliable long-term performance. With a compact footprint and flexible drainage options, it is an ideal solution for specialized or smaller laundry environments.
