

Top-Loading Washing and Drying Machine

This appliance combines washing and drying capabilities in a single unit. It features a top-loading design with a transparent lid and digital controls.

Product Overview

Efficiency and Performance Combined

This top-loading appliance offers a comprehensive solution for both washing and drying laundry in a compact design. Equipped with an intuitive digital interface, it allows for seamless cycle selection to handle diverse garment types efficiently. The unit is designed for household environments and adheres to rigorous energy consumption standards for optimal operational economy.

Technical Specifications

Key Features

- Transparent top-loading lid
- Digital control interface
- Integrated washing and drying functions
- High-visibility control panel

Appliance Type	Top-loading washer and dryer
Energy Efficiency Index	63
