

Top-Loading Washing Machine with Digital Controls

This top-loading washing machine features cellular tub technology and microcomputer control. Multiple wash programs, adjustable water level, delay start, and a digital display are included for efficient process monitoring and water reuse.

Product Overview

High-Efficiency Top-Loading Solution

This top-loading washing machine features advanced cellular tub technology designed for optimal fabric care and cleaning performance. Integrated with precise microcomputer control, the unit offers intuitive operation via a digital display for real-time process monitoring. The machine is engineered to support sustainable laundry practices through an integrated water reuse system.

Key Features

Advanced Capabilities

Cellular Tub Technology, Microcomputer Control, Digital Display, Water Reuse System, Delay Start

Performance Settings

Operational Controls

36 programs

Program Cycle Count

User Adjustments

- Multiple wash programs
- Adjustable water levels
- Delay start functionality
