

Top-Loading Washing Machine with Spin Tubs

This top-loading washing machine features separate wash and spin tubs. It is designed for efficient water and energy usage and is suitable for small to medium-sized laundry loads.

Product Overview

Efficient Laundry Solution

This top-loading washing machine is engineered for efficiency and durability, featuring a robust plastic body suitable for demanding environments. Designed with dual-tub functionality, it provides independent timers for both washing and spinning cycles to ensure optimal results. It is an ideal choice for small to medium-sized laundry loads requiring energy and water conservation.
