

Top Mount No Frost Refrigerator

This top mount no frost refrigerator features a metal door and no frost technology to prevent ice buildup. It has a spacious interior with adjustable shelves and a crisper drawer.

Overview

High-Efficiency Dual Inverter Cooling

This top mount refrigerator features advanced dual inverter cooling technology, ensuring optimal temperature stability and energy efficiency, meeting the EU's new energy class E standards. Designed for modern convenience, it utilizes total no frost technology to eliminate manual defrosting while providing a spacious combined capacity of 528 liters. The interior is enhanced with stylish LED lighting and flexible storage options, including humidity-controlled crispers and optional fresh boxes to keep produce at its best.
