

Toroidal Core Tape Wrapping Machine

This machine is designed for applying tape to toroidal iron cores with precision. It features adjustable clamping for different core sizes, ensuring ease of use.

Product Overview

Professional Toroidal Core Wrapping Solution

This specialized tape wrapping machine is engineered for precision application of insulation materials onto toroidal cores, inductors, and coils. Featuring adjustable clamping and a compact design, it offers a robust solution for enhancing production consistency and efficiency. Its user-friendly interface makes it an ideal tool for demanding electronic component manufacturing environments.

Technical Specifications

Model	SLP-21
Machine Size (L x W x H)	260 x 230 x 170 mm
Maximum Clamping Size	50 mm
Net/Gross Weight	9 kg

Certifications

Compliance and Standards
CE • ISO 9001
