

Torque Transmission Clutch Disc

This clutch disc transmits torque from the engine to the gearbox in a vehicle's transmission system. It has friction material for efficient engagement and damper springs to absorb vibrations.

Product Overview

High-Performance Transmission Component

This torque transmission clutch disc is engineered for reliability and efficient power transfer within the vehicle's transmission system. Designed with robust friction material lining, it ensures smooth engagement and disengagement during gear changes. The integrated damper springs are specifically included to absorb vibrations and minimize operational noise, promoting a quieter and more stable driving experience.

Technical Specifications

Part Number	001849/026453
Production Date	2017/06/08
Reference Codes	17083, 121878006197
