

Touchless Sanitizer Dispenser for Liquid, Spray, Gel, and Foam

This touchless dispenser is designed for use with liquid, spray, gel, or foam sanitizers. It features a sensor that allows for hands-free operation to promote hygiene and prevent cross-contamination.

Product Overview

Touchless Sanitizer Solution

This automatic hand sanitizer dispenser provides a touch-free hygiene solution suitable for diverse professional environments. Designed to prevent cross-contamination through sensor-activated technology, it supports a wide variety of sanitizing media including liquid, spray, gel, and foam. Its durable construction ensures reliable performance in high-traffic public areas such as hospitals, schools, and offices.

Technical Features

Operation Mode	Automatic (Sensor-based)
