

Touchless Stainless Steel Trash Can

This trash can is made of stainless steel. It features touchless operation for hygiene and convenience.

Product Overview

High-end stainless steel construction featuring intelligent motion sensor technology.

Smart Hygiene Solutions

This premium touchless trash can is constructed from durable, thickened 410 stainless steel, offering exceptional resistance to corrosion and rust. Engineered for modern environments, it features intelligent infrared motion detection with a 0.2-second response time and a 25cm sensing range. With IPx5 waterproof protection and a sealed design to minimize odors, it provides a quiet, hygienic, and convenient waste management solution for kitchens, bedrooms, and professional hotel settings.
