

Touchless Stainless Steel Trash Can

This touchless trash can is made of stainless steel. It features a sensor for automatic lid opening and provides hands-free operation.

Product Overview

A display of available color finishes and technical capabilities for the smart trash can series.

Smart Hygiene Solutions

This premium touchless stainless steel trash can is designed for professional and high-end environments, offering a sophisticated blend of durability and hygiene. Equipped with a high-speed infrared motion sensor, it enables hands-free waste disposal in just 0.2 seconds, effectively reducing germ spread. The unit features a robust 410 stainless steel construction with an IPx5 waterproof rating, making it ideal for high-traffic areas like kitchens, offices, and hotel rooms.
