

# Towable Center Pivot Irrigation System

This center pivot system features wheels assembled on the central part, allowing it to be easily towed between locations. Utilizing a single machine, it efficiently irrigates multiple, separate land areas.

## ADDITIONAL IMAGES

## System Overview

### Towable Center Pivot Irrigation System

This towable center pivot irrigation system is designed to provide highly efficient and uniform water distribution across multiple agricultural fields. By enabling the main pivot point to be easily towed by tractor or hand, a single unit can service several different land plots to optimize your irrigation investment. The system features robust construction and customizable configurations to meet specific field requirements.

#### Mobility

Towable via tractor or hand

## Technical Specifications

### Span Lengths

- 135ft (41.15m)
- 157ft (47.85m)
- 179ft (54.56m)
- 201ft (61.26m)

#### Available Pipe Diameters

8 inch, 6 5/8 inch, 5 9/16 inch

#### Joint Material Options

Standard Hot Deep Galvanized, Polylined, Stainless Steel

## Wheel and Tire Options

### Tire Configuration Table

Tire Size	Rim/Type
14.9x24	8" rim tubeless
14.9x24	10" rim tubeless
16.9x24	Tube type
11.2x38	Tube type
Rubber	Non-pneumatic

## Overhang Specifications

### Overhang Lengths

- 22ft (6.7m)
- 44ft (13.4m)
- 66ft (21.1m)
- 88ft (26.8m)
