

Towel Disinfection Cabinet

This stainless steel towel disinfection cabinet is designed for hygienic towel storage and sterilization. It features a transparent front panel, interior racks, and electronic controls, making it ideal for commercial use.

Product Overview

Professional Towel Hygiene Solution

This 28L towel disinfection cabinet is designed to maintain high standards of hygiene in professional environments such as salons, spas, and fitness centers. Utilizing advanced high-temperature sterilization reaching 125 degrees Celsius, it ensures towels are thoroughly sanitized and ready for use. The unit features a durable construction with a tempered glass door, providing a clear view of the interior while ensuring safe and efficient operation.
