

Tower Air Conditioner with Golden Fins

This tower air conditioner features a larger wind flow for extended air supply distance and fast cooling capabilities. Its golden fins improve cooling efficiency and resist corrosion.

Product Overview

High-Performance Tower Air Conditioning

This floor-standing tower air conditioner is designed for powerful cooling and long-distance air supply in residential or commercial environments. Featuring advanced golden fin technology and an optimized airflow system, it delivers rapid temperature reduction even in extreme climates. Its sleek vertical design optimizes floor space while providing a modern aesthetic for any professional or living space.

Performance Metrics

Achieves desired temperature settings quickly with 30-second fast cooling technology.

Key Performance Metrics

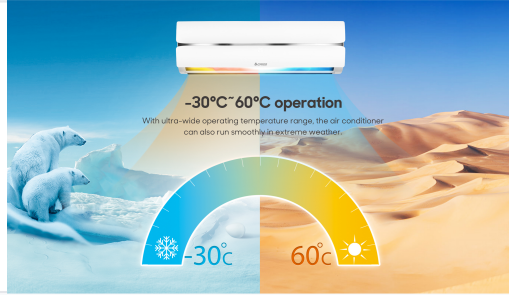

30 s

Fast Cooling Time

9 %

Cooling Efficiency Increase

Operating Conditions

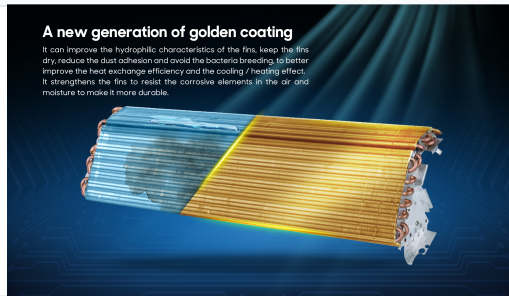

Reliable operation in extreme weather conditions ranging from -30°C to 60°C.

Operating Temperature Range

Condition	Limit
Minimum Operating Temperature	-30°C
Maximum Operating Temperature	60°C

Advanced Features

The new generation golden coating improves heat exchange efficiency and prevents bacterial growth.

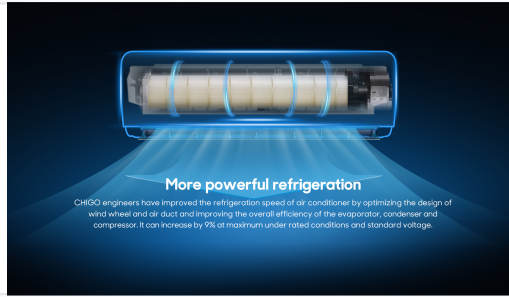

Enhanced Durability & Hygiene

The unit utilizes a new generation of golden coating on the fins to improve hydrophilic characteristics. This technology keeps the fins dry, reduces dust adhesion, and prevents bacteria breeding, which significantly improves heat exchange efficiency and resists corrosive environmental elements.

Core Features

Golden Fins, Fast Cooling, Long Distance Air Supply, Extreme Weather Operation, Digital Display, Multi-directional Airflow

Cooling System

Optimized wind wheel and air duct design provides up to 9% increase in cooling performance.

Cooling Capabilities

- Optimized wind wheel and air duct design
- High-frequency startup for rapid cooling
- Improved evaporator and condenser efficiency
- Washable filter for air quality maintenance

Design & Installation

Maintenance

Washable Filter • Anti-Corrosive Coating • Dust Resistant

Form Factor

Floor-standing vertical tower
