Product Overview

Efficient Cooling Solution

This tower air cooler offers a versatile and energy-efficient alternative to traditional air conditioning, ideal for maintaining comfort in home or office environments. It features a water pump sprinkling cycling system paired with a 7L water tank for effective cooling and humidification. With user-friendly controls, including a remote and digital display, it provides customizable airflow through multiple speed and mode settings.

Performance Metrics

Cooling Power

45 W

Cooling Power

7 L

Water Tank Capacity

Airflow Configuration

- 3 wind speed settings
- 3 wind modes
- 90° oscillation

Features & Controls

Timer Range

1-7 hours

Control Options

Remote Control, Digital Display

Maintenance & Safety

Safety Systems

- Water pump protection system
- Dust-proof filter protection

Filter Type

Dismountable honeycomb filter
