Product Overview

Versatile Tower Air Cooler

This modern tower air cooler offers efficient cooling through an evaporative water system with a generous 6L capacity. Designed for comfort, it features three wind speeds, an 8-hour timer, and multi-directional swing functionality to ensure even airflow. The unit includes a user-friendly digital temperature display, remote control, and safety features like an auto-shutoff for an empty tank, making it a reliable solution for residential or small office environments.
