Overview

Advanced Tower Air Purification

This tower air purifier offers a comprehensive 3-in-1 filtration solution designed to improve indoor air quality in small to medium-sized rooms. By combining a HEPA-type filter, activated carbon, and a pre-filter, it effectively captures dust, allergens, and odors. Integrated UVC light and photocatalyst technology provide an additional layer of protection by neutralizing airborne bacteria and viruses for a healthier environment.

Effective Area

14-24m2

Noise Level

42dB(A) - 62dB(A)

Technical Specifications

Model

KJ150GE-B1

Rated Power

45 W

Dimensions (L x W x H)

215 x 176 x 585 mm

Features

Filtration Technology

- Pre-filter
- HEPA-type filter (True HEPA H13 optional)
- Activated carbon filter
- UVC light sterilization
- Photocatalyst

Smart Features

Auto Mode, Air Quality Indicator, 3 Fan Speeds, Sleep Mode, Negative Ion Release, 24hr Timer, Filter Change Reminder
