

Tower Crane

This is a tower crane commonly used in construction. It efficiently lifts heavy materials on construction sites.

Overview

High-Performance Tower Crane

This industrial-grade tower crane is engineered for heavy-duty lifting operations on large-scale construction sites. Featuring a robust lattice-structured tower design, it provides exceptional stability and reach for vertical material handling. Its yellow high-visibility finish and long horizontal jib configuration make it an ideal solution for complex infrastructure and building projects.

Technical Specifications

Crane Type	Tower Crane
Tower Structure	Lattice
