

Tower Fan and Exhaust Fan Combination

This product combines a tower fan and an exhaust fan in one unit. The tower fan provides adjustable airflow, while the exhaust fan extracts air for ventilation.

Overview

Dual-Function Air Management

This versatile unit combines a tower fan with an integrated exhaust fan system, providing a comprehensive solution for both air circulation and ventilation. Designed for efficiency, the system features intuitive manual controls, including dedicated timer dials for both fan functions. Its compact, light beige design ensures it blends seamlessly into various professional or commercial environments.
