

Tower Fan with Evaporative Cooling

This tower fan is designed for household use, providing both cooling and ventilation. It features a compact design with a louvered front panel and includes a remote control for convenient operation.

Product Overview

Versatile Cooling Solution

This tower-style unit offers a dual-function approach to climate control, combining efficient airflow with evaporative cooling technology. Designed for flexibility, it features a compact footprint and integrated casters, allowing for easy mobility between spaces. With user-friendly controls including a remote, it provides a practical solution for both residential and light commercial ventilation needs.

Key Features

Core Features

- Evaporative cooling technology
- Tower-style compact design
