

Tower Fan with Remote Control

This tower fan provides indoor air circulation and cooling. It features multi-speed settings, a remote control, a front grill, and a water tank for evaporative cooling.

Product Overview

Efficient Indoor Cooling Solution

This tower-style electrical fan is engineered for effective indoor air circulation and cooling. Featuring a sleek, compact design, it is ideal for various household environments where space is at a premium. With integrated evaporative cooling capabilities and convenient remote control operation, it provides a versatile solution for maintaining comfort.
