

## Tower Fan with Simulated Flame Effect

This tower fan provides cooling with a front grille for air circulation. It features a remote control, caster wheels for mobility, and a simulated flame effect at the base.

### Product Overview

#### Modern Comfort with Ambiance

This tower fan combines efficient air circulation with a unique aesthetic appeal, featuring a simulated flame effect at its base to create a cozy atmosphere. Its tall, slender profile is designed for space-saving placement in offices or living areas. Equipped with convenient caster wheels and a remote control, this unit offers both mobility and ease of use for professional environments.
