Product Overview

Efficient PTC Tower Heating Solution

This tower PTC fan heater is engineered for rapid and reliable warming of professional spaces. Utilizing advanced ceramic heating elements, it provides a safe, energy-efficient, and self-regulating environment. The unit features a space-saving tower design with wide-angle oscillation to ensure even heat distribution across the room.

Technical Specifications

Heat Output Settings

1000 W
Low Heat

2000 W
High Heat

Electrical Requirements

220-240V 50Hz

Safety & Features

Integrated Safety

- Overheat protection
- Safety thermal cut-out
- Safety tip-over switch

Safety Certifications

GS, CE, LVD, EMC, ROHS, REACH, ERP

Design & Utility

Operational Features

- Adjustable thermostat control
- Wide-angle oscillating function
- Recessed carry handle
- Integrated cord storage
- Portable casters for mobility

Logistics

Container Loading Quantities

Container Type	Capacity (Sets)
20'	1100
