

Tower Style PTC Fan Heater

This tower-style PTC fan heater provides efficient and safe space heating. It uses a positive temperature coefficient (PTC) heating element for rapid heating and energy efficiency.

Overview

Efficiency Meets Comfort

This tower-style PTC fan heater utilizes advanced ceramic heating elements for rapid and consistent heat distribution throughout the room. Designed with modern aesthetics and user safety in mind, it features intelligent temperature control and multiple security mechanisms. Perfect for professional and residential environments, it combines high power output with precise operational settings.

Technical Specifications

Power Consumption

2000 W

Maximum Power

Heat Settings

- 1000W
- 2000W

Voltage

220-240V

Frequency

50Hz

Features

Control Options

- Adjustable Thermostat
- Remote Control
- LED Temperature Display
- 8-hour Timer

Safety Features

Thermal Cut-out, Tip-over Switch, Overheat Protection

Logistics

Packaging and Shipping

Metric	Value
Carton Dimensions	610x435x410mm
Units per Carton	4pcs
20' Container	1026pcs
40' Container	2132pcs
40'HQ Container	2500pcs
