Product Overview

Efficient Tower Heating Solution

This tower-style PTC space heater combines safety and performance to provide optimal warmth for your indoor spaces. Featuring a silent DC motor and advanced oscillation, it ensures even heat distribution while operating quietly. The unit offers user-friendly controls, including a 24-hour timer and adjustable thermostat, making it a reliable solution for professional and residential environments.

Technical Specifications

Power Modes

1000 W
Low Heat

2000 W
High Heat

Electrical Requirements

- Voltage: 220-240V
- Frequency: 50/60Hz

Features & Safety

Control Functionality

- LCD Digital Display
- 24-Hour Programmable Timer
- Adjustable Thermostat
- Oscillation Mode
- ECO Energy Saving Mode

Safety Certifications & Mechanisms

Overheat Protection, Safety Fuse, Tip-over Switch

Model Options

Available Configurations

Model Code	Connectivity
TPH1105	Basic
TPH1105R	Remote Control
TPH105W	WIFI Enabled
