

Toy Sharp Point Tester

This tester determines if accessible sharp points on toys are likely to cause injury. An LED illuminates if the point penetrates a specified depth, indicating unacceptable sharpness.

Product Overview

Precision Safety Compliance

This Toy Sharp Point Tester is an essential precision instrument designed to verify that children's toys meet rigorous safety requirements. It identifies hazardous sharp points that could cause injury by simulating a child's interaction with the product. Featuring a highly sensitive LED indicator, this device ensures quick and accurate assessment, making it indispensable for quality control departments and regulatory compliance labs.

Physical Specifications

Dimensions	112 x 16 x 16 mm
Weight	80 g

Standards & Compliance

Supported Standards	16 CFR 1500.48, ASTM F963 4.8, EN-71 1998 8.14, ISO 8124
---------------------	--

Equipment Accessories

Included Components

- Calibration weight
- Batteries
- Bulb (2 pieces)
- Protective carrying case
