

# TR412 Tubeless Tire Valve Stem

The TR412 tubeless tire valve stem is essential for maintaining proper tire inflation and ensuring safe vehicle operation. Constructed from high-quality rubber and brass, it offers excellent durability and corrosion resistance.

## Product Overview

### TR412 Tubeless Tire Valve Stem

The TR412 tubeless tire valve stem is a vital component engineered for maintaining precise tire inflation and ensuring operational safety. Crafted from high-quality rubber and brass, this valve stem provides an exceptionally reliable airtight seal between the wheel and the tire. Its durable construction offers superior resistance to corrosion, making it a dependable choice for diverse vehicle wheel configurations.

## Technical Specifications

### Materials

- High-quality rubber
- Brass

Valve Application	Tubeless Tires
Model ID	JS-2(P29)

## Features

### Product Highlights

Corrosion Resistant • Standard Valve Core • Compact Design • Includes Protective Cap
