Overview

High-Performance Track-Drive Snow Removal

This track-drive snow thrower is engineered for consistent performance on icy, slippery, and steep terrain. By maintaining constant contact with the surface, it ensures efficient snow removal regardless of ground conditions. With a robust engine and multiple speed settings, this machine provides the power and control necessary for professional-grade winter maintenance.

Performance & Engine

Transmission Speeds

6 Forward Speeds	2 Reverse Speeds
----------------------------	----------------------------

Engine Displacement	375 cc
Start Mode	Electric start

Dimensions & Capacity

Clearing Dimensions

Metric	Value
Clearing Width	34 inch / 868 mm
Intake Height	21 inch / 540 mm
Throwing Distance	d 15m

Weight (G.W./N.W.)	160 / 141 kg
--------------------	--------------

Features & Controls

Chute & Deflector

- Deflector control: Hand grip on panel
- Deflector material: Metal
- Chute control: Hand grip on panel
- Chute material: Metal

Key Features

Differential System, One Hand Operation, Heated Hand Grip, LED Headlight
