Overview

Versatile Material Handling Solution

This tracked mini dumper is engineered for efficient material transport in agricultural and construction environments. Featuring a robust crawler track system, it provides superior traction and stability on uneven or challenging terrain. With a full hydraulic system and automatic loading capabilities, it streamlines operations while maintaining a compact footprint suitable for confined spaces.

Performance & Capacity

Maximum Loading Capacity

500 KG
Max Load

Drive System	Crawler track unit
Hydraulic System	Yes
Loading Mechanism	Full-automatic

Customization & Accessories

Available Optional Kits

- Snow shovel
- Forklift
- Heightened fence
