Product Overview

Professional Disc Plough for 4-Wheel Tractors

This tractor-mounted disc plough is engineered for efficient land preparation, featuring a durable round pipe frame that ensures structural integrity in demanding conditions. The independently rotating steel discs effectively cut through weeds, stems, and soil, while preventing grass winding or clogging. Designed for versatility and performance, this implement is an essential tool for primary tillage, soil aeration, and crop residue incorporation.

Key Features

Advantages

- Anti-clogging and non-winding design
- Effective cutting of stems and roots
- Low working resistance
- Designed for 4-wheel tractors
- Heavy-duty round pipe frame
