

Tractor Backhoe Attachment

This backhoe attachment is designed for tractors and agricultural machinery. It features a heavy-duty bucket with reinforced teeth for digging and excavation.

Overview

Versatile Excavation Power

This backhoe attachment is designed to transform your existing agricultural tractor into a capable digging machine. Featuring a telescopic cantilever bucket and a robust hydraulic system, it is engineered for precision and durability in demanding tasks. It is an ideal solution for small-scale irrigation, water conservancy projects, and residential excavation needs.

Technical Specifications

Core Components

- Telescopic cantilever digging bucket
- Console-mounted pivot assembly
- Hydraulic multi-channel reversing valve
- PTO-driven transmission system

Mounting Configuration

Rear axle mount, Engine flywheel housing mount, Tractor PTO connection

Applications

Recommended Use Cases

- Small-scale irrigation projects
- Water conservancy construction
- Rural residential base excavation
- Channel excavation and backfilling
- Underground pipe ditching

Warranty & Support

Warranty Coverage

Sales Type	Warranty Period
Branded Sales	24 Months
OEM Sales	12 Months
