

Tractor Brake Drum

This brake drum is designed for use in MTZ tractors. It is constructed from durable metal and provides reliable braking performance.

Product Overview

High-Performance Brake Drum

This durable brake drum is engineered for heavy-duty applications, including tractors, trucks, trailers, and buses. Manufactured using high-quality ductile cast iron and precision CNC machining, it ensures reliable braking performance and long service life. Designed to meet rigorous industry standards, this component is suitable for a wide range of international vehicle makes and models.

Technical Specifications

Material	Ductile Cast Iron
Machining	CNC

Compatibility

Supported Vehicle Types	Trucks, Buses, Tractors, Trailers
-------------------------	-----------------------------------

Logistics & Manufacturing

Production Timeline

Process	Duration
Mould Making	15-20 days
Sample Preparation	5-7 days
Production	Approx. 20 days

Packaging	Pallets
-----------	---------

Service Advantages

Why Choose Us

- Excellent and high quality control
- Prompt delivery
- Competitive pricing
- Small orders accepted
- Customization based on drawings or samples
