

# Tractor Control Lever

This control lever is designed for use in tractor applications. It features a durable metal construction with a black finish, a bent design for ergonomic operation, and secure mounting hardware.

## Product Overview

### Tractor Control Lever

This durable metal control lever is specifically engineered for tractor applications, ensuring reliable performance in demanding agricultural environments. The component features a robust construction with a specialized black finish for enhanced corrosion resistance. Its ergonomic bent design allows for precise control during operation, while the square mounting block and cylindrical end fitting ensure secure, long-lasting attachment to your machinery.

## Manufacturing Process

### Production Workflow

- Stamping
- Machining
- Welding
- Painting

## Design Features

### Surface Finish

Black Finish • Corrosion Resistant

### Design Type

Bent ergonomic design

## Mechanical Specifications

### Mounting Interface

Square mounting block

### End Fitting

Cylindrical end fitting
