

Tractor Differential Side Gear

This is a differential side gear designed for Kubota tractors. The gear is compatible with M7040 and M9540 models.

Product Overview

Precision Engineered Differential Side Gear

This high-quality differential side gear is engineered to ensure reliable power transmission and smooth operation within the drivetrain. Designed as a cost-effective alternative to OEM parts, it is crafted for durability to handle demanding agricultural applications. The component plays a critical role in facilitating proper differential action during tractor operation.

Technical Specifications

High-quality drivetrain components engineered for reliability and performance.

Part Number	3c091-43110
Application Category	Tractor Spare Parts, Drivetrain Components, Differential Assembly

Compatibility

Compatible Models

- M7040
- M9540

Quality Standards

Key Performance Features

High Durability • Precision Fit • Optimized Power Transmission • Cost-Effective Solution
