Product Overview

Heavy-Duty Tractor Grader

This robust grader attachment is engineered for demanding agricultural and maintenance environments. Designed for leveling, grading, and backfilling, it features a high-strength steel frame and a reversible cutting edge for extended service life. With its versatile three-point hitch system, it offers precise control over grading depth and angle, making it an ideal solution for soil preparation, road maintenance, and debris clearing.

Technical Specifications

Model	5GBH	6GBH
Dimensions(L*W*H)	1520*1250*1100mm	1820*1250*1100mm
Working Width	1500mm	1800mm
Structure Weight	90kg	105kg
Tractor Horsepower	20-40hp	30-55hp

Comparison of dimensions, working width, weight, and horsepower requirements for our available grader models.

Key Features

Primary Applications

- Soil leveling and grading
- Backfilling
- Gravel road maintenance
- Debris clearing
- Soil preparation for planting

Compatibility & Design

Three-point hitch system, Adjustable blade angle, Reversible cutting edge, High-strength steel construction
