Overview

Versatile Tractor-Mounted Excavation

The BHM series backhoe attachment is a robust implement designed for a wide range of agricultural and construction tasks, including digging, trenching, and earthmoving. It features a powerful hydraulic system driven by the tractor's PTO, ensuring precise control and reliable performance in demanding conditions. With a compact design, 180-degree swivel capability, and stabilizer legs, this attachment offers excellent maneuverability and stability in tight spaces, making it an ideal addition to any equipment fleet.

Technical Specifications

Dead Weight	250 kg
Standard Bucket Width	300 mm
Swivel Angle	180 degrees
Drive System	PTO Driven
Tractor HP Requirement	18-35 HP

Compatibility

Mounting Type	3-Point Linkage
Available Series Models	BHM95, BHM175, BHM195, BHM225

Features

Boom Configurations

Configuration	Key Benefit
Fixed Boom	General all-round requirements
Side-Shift Boom	Digging closer to fence lines and buildings

Key Operational Features

- Hydraulic stabilizer legs
- 180-degree lateral swivel
- Quick-attach 3-point linkage
- Compact structural design
